EXPERIENCE

Intern, Dell Technologies

Jul 2019 - Jul 2020

Web development - Enhanced user experience by fine-tuning process, developed a module on cafeteria, helped the developers in creating templates using Bootstrap. The technology used was Angular for front-end.

POC - An application to assist the tech support to directly scan and get user details to make the process of tech assistance faster. Worked on python script which helped to get details from scanned image and used some image processing techniques to enhance the image.

POC - To solve the problem of the product architects an application was to scan and get the editable architecture diagram on ppt was developed using python. The project included Yolo object detection framework and Azure for text detection.

PROJECTS

The Virtual Walk-in Nitte.

- A desktop-based virtual reality project is a windows-based application which gives a virtual tour of the campus. Unity-3d was used for developing this project. This project was used for virtual campus tour for freshers.

Hotel Management System

- A Desktop application to automate the process of billing. The GUI based program was designed using Python tkinter and excel was used as database.

Paper Agent Android Application

- Newspaper and Magazine subscription management system. This application was built for android mobiles using android studio and MySQL for the backend.

EDUCATION

Masters, Computer Science and Engineering
NMAM Institute of Technology

Oct 2018 - Aug 2020
CGPA: 8.98

Bachelor of Engineering, Computer Science and Engineering
NMAM Institute of Technology

Oct 2014 - Oct 2018
CGPA: 7.56

SKILLS

Programming Languages: Python, JavaScript

Frameworks: Bootstrap, Basics of Angular, Flask

Database: MySQL, PostgreSQL, SQLAlchemy
